---- DRAFT

Cecilia:

Do you want to include any comments regarding FAR contracting requirements?

Thank you for your proposal to provide support services on the West Lake Landfill site and the recommendation to utilize the US Army Corps of Engineers (USACE). We are in preliminary discussions with USACE regarding technical assistance that they can provide to EPA on this project. You've indicated that you would like to help and proposed conducting systematic soil sampling to conduct a dose and risk assessment. A Baseline Risk Assessment was completed as part of the Remedial Investigation/Feasibility Study on the site. It's available on EPA's web site at _____. If you would like to provide input on this project, a community advisory group (CAG) has been established. Information regarding their meeting dates and times are noted below: _____

To whom it may concern:

I am a contractor working on the FUSRAP CERCLA site in the st. Louis area and iowa areas. I am qualified in doing Dose and Risk assessments using RESRAD onsite and RESRAD offsite along with RESRAD build. I have done several dose and risk assessments on the FUSRAP sites for the USACE. The Westlake Landfill has become a huge issue for the public in the St. Louis area. I hope that this is something the EPA can give to USACE to clean up or to diagnose the amount of radiation. I think a dose and risk assessment could be done dealing with the amount of pci/g found in the landfill by doing a systematic soil sampling event. I would love to help and I propose doing it very conservative to find the worst possible scenario.
